IRONING SYSTEMS WITH CONTINUOUS REFILLING

Stiro Meglio VVX 815

3D STEAM SYSTEM

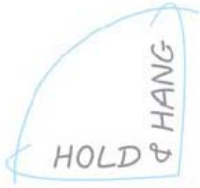
Quality, quantity and reliability are the main dimensions of ironing. De'Longhi is at the peak of all 3 dimensions this is the reason why it has been named "3D STEAM SYSTEM"

CONTINUOUS REFILLING

The possibility to continuously refill the tank with water enables you to iron without any stops

HOLD & HANG

"Hold & Hang" special device. The metal frame is a protection for the iron when it's laid down, it becomes a steam cable support when turned up



IRONING SYSTEMS

VVX 815

- Continuous refilling for unlimited ironing
- Ready in 2 minutes
- Steam production: up to 90 g/min
- 4-bar pressure to guarantee professional results
- Hold&Hang special device
- Large funnel to fill the water tank at any time
- The first "Double material" boiler: stainless steel higher part and Super Alloy EN AB 44100 lower part, a De'Longhi patent
- Tap water can be used
- Steam control knob to adjust steam emission to the fabrics being ironed
- NEW ANTICALC SYSTEM WITH BOILER CLEANING CAP: the special cap placed on the lower part of the boiler allows a thorough rinsing, thus reducing calcium deposits, for a longer life of the appliance
- Pressure stabiliser to maintain a constant jet of steam
- "Ok steam" indicator light.
- "Empty boiler" indicator light.
- Opposite cable exit
- Power cord storage
- Vertical steam emission to iron curtains, jackets, suits, ecc.
- Vertical iron rest position.
- New domestic iron with easy-glide stainless steel soleplate.
- Easy-to-use innovative knob for steam control. Specially designed to make ironing more comfortable, it has a continuous steam setting.
- Safety thermostat.

TECHNICAL DATA		
Iron dimensions (wxdxh)	mm	278x117x143
Boiler dimensions (wxdxh)	mm	380x215x145
Weight	kg	4,2
Maximum input power	W	2200
Boiler input power	W	1400
Iron input power	W	800
Boiler capacity	cc	1500
Rated voltage/Frequency	V~ Hz	220/240~ 50/60
Iron		Domestic
Soleplate		Stainless steel
